Silhouette[®] lift

A Minimally Invasive Facial Rejuvenation

Silhouette Lift is a revolutionary procedure for patients who are seeking a significant lift without invasive surgery.

It is a ONE-TIME procedure which takes only ONE HOUR to perform.

- FDA Approved
- Local Anesthesia Only
- 2 to 4 Days Downtime
- Immediate and Long Lasting Results
- Affordable Procedure

Effective for a Large Range of Patients

Silhouette Lift[®] is suitable for both men and women who want to achieve a younger looking appearance without the constraint of under going a traditional facelift.

Silhouette Lift[®] is ideal for correcting signs of aging in the nasolabia folds, the expression lines and the jowls.

Silhouette Lift[®] gives you the opportunity to regain volume in the cheeks, and to redefine your jaw line.

Before 1 Week After

A One Hour Procedure

Silhouette Lift[®] is performed in four stages:

- Local Anesthesia
- Mini incision in the temporal area and insertion of the Silhouette Sutures[®]
- The Silhouette Sutures[®] are anchored in the facial tissues.
- The Silhouette Sutures[®] are fastened in the temporal area and the incision is closed.

A Unique Feature

Silhouette Sutures[®] are the only suture of its kind with the ability to be re-tightened after a few years to provide extended longevity of the lift.

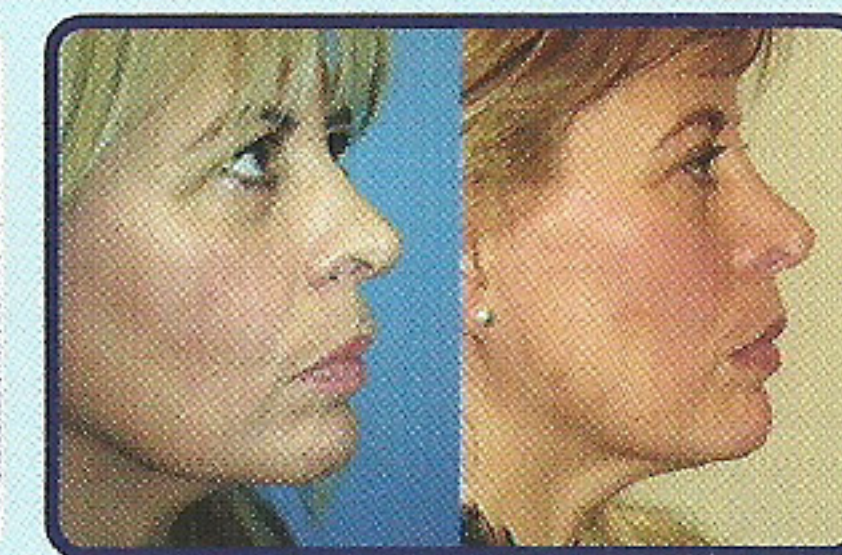

A Safe Procedure

- Silhouette Sutures[®] were FDA approved in 2006 and are the **only FDA approved suspension sutures for mid-face lift**. In addition, the patented sutures have achieved the CE mark in Europe and are TGA approved in Australia.
- Silhouette Sutures[®] are a new type of suspension suture developed specifically for the procedure and offers significantly greater lift thanks to its unique bio-resorbable cones and non-absorbable polypropylene suture.
- This FDA approved, minimally invasive alternative to a facelift is growing in popularity, having been successfully performed over 25,000 times in over 55 countries around the world.
- In addition to cosmetic use, the Silhouette Sutures[®] are used by surgeons within major hospitals nationwide and throughout Europe for reconstructive surgery.
- Silhouette Lift[®] is only performed by trained and certificated physicians, ask your doctor if Silhouette Lift[®] is right for you.
